

(a) Location-based persistence

a.xmi

href = b.xmi#//Person

b.xmi

version 2 (current)

The reference resolves to whatever b.xmi holds now.

Version 1 was overwritten at the same address.

(b) Content-addressed persistence

ipfs://QmA

href = ipfs://QmB1#//Person

ipfs://QmB1

B, version 1

save after
a change

ipfs://QmB2

B, version 2

Pinned to version 1 until A is saved with a new reference.
